SUPREM KHATRI

Software Engineer | Data Analyst

+977-9848820763 | Supremekc83.work@gmail.com | Kathmandu, Nepal | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Computer Science student (CGPA 3.65, Dean's List every semester) and versatile engineer with hands-on internship experience shipping Django REST APIs in production. Comfortable across the backend stack Python, Django, FastAPI, PostgreSQL, Docker and the data analytics toolkit SQL, Pandas, Power BI, Tableau with experience in ETL pipelines, data ingestion, applied machine learning, and turning raw data into executive-ready insights. Proven ability to ship full-stack, data-driven applications end-to-end, from database design to interactive dashboards. Strong foundation in OOP, system design, and clean architecture.

EXPERIENCE

Software Engineer Intern - Core Walkers Pvt. Ltd. Jan 2026 – Mar 2026

Kathmandu, Nepal · 3-month internship

- Built and maintained REST API endpoints in Django and Django REST Framework for core product modules, working within an existing production codebase alongside senior engineers.
- Modelled and optimized PostgreSQL schemas and queries for transactional data (orders, inventory, customer records), improving query performance on high-traffic endpoints.
- Wrote unit and integration tests to validate API behaviour and fixed bugs surfaced through code review, cutting recurring defect reports in the sprint backlog.
- Collaborated in an Agile team using Git-based version control and code review workflows, participating in daily stand-ups and sprint planning.

PROJECTS

PulseScope- Full-Stack Financial News Analytics Platform (GitHub)

- Built a production-ready analytics platform processing 50K+ financial news article, achieving 87% sentiment classification accuracy using FinBERT and VADER, reducing manual analysis time by ~40%.
- Developed a React/TypeScript dashboard with real-time sentiment tracking and BERTopic-powered topic modelling, backed by PostgreSQL with optimized queries and fully documented FastAPI REST endpoints.

Ecommerce Analytics and Sales Forecasting Pipeline (GitHub)

- Designed an end-to-end ETL pipeline handling 10K+ transaction records in PostgreSQL with Docker; integrated Facebook Prophet for 90-day sales forecasting, achieving under 8% mean absolute error (MAE).
- Built interactive Power BI dashboards visualizing customer segments, top products, monthly revenue trends, and country-level performance demonstrating full data storytelling from raw data to executive-ready visuals.

DokanDaftar - Inventory, Billing & VAT Platform (GitHub)

- Built a Nepal-first shop management system that replaces paper khata with digital inventory, sales billing, and customer credit (udhaaro) tracking for retailers and small businesses.
- Implemented IRD-oriented VAT invoicing and Nepali fiscal-year rules so businesses can issue tax invoices, track dues, and stay audit-ready without manual VAT math.
- Delivered it as a multi-tenant SaaS one Django and React platform serving many businesses, each with isolated data, roles, and day-to-day workflows (stock, sales, payments, reports).

TECHNICAL SKILLS

Languages: Python, SQL, Java
Backend: Django, FastAPI, REST API Design,
ML / Data Science: Scikit-Learn, PyTorch, Pandas, NumPy, OpenCV, LangChain
Data Handling: CSV/Excel/TXT Ingestion, ETL Pipelines, Data Validation & Cleaning, BeautifulSoup, Playwright
Visualization & BI: Power BI, Tableau, Matplotlib, Seaborn, Plotly
Databases: PostgreSQL, MySQL, MongoDB
Frontend: React, TypeScript (basic), HTML/CSS
DevOps & Tools: Docker, Git, GitHub, Linux, Jupyter Notebook, VS Code, Figma, Adobe, postman
CS Fundamentals: Data Structures & Algorithms, OOP, System Design, Design Patterns

EDUCATION

Bachelor of Computer Science (Honours) - IIMS College / Taylor's University Jan 2023 – Dec 2026

Kathmandu, Nepal · CGPA: 3.65 (Dean's List every semester (3.5+ GPA maintained consistently))

CERTIFICATIONS

- Data Science with Python (Great Learning)
- Data Analyst Certificate (DataCamp)
- Python Data Fundamentals (DataCamp)
- Git/GitHub Foundations (DataCamp)
